7360A Release/Removal Liner Specification Change

Dear Valued Customer

We are writing to inform you of a change that impacts products you purchase from Henkel. Our supplier for the release liner used on products you purchase has updated the allowable peel off strength specification. Currently the supplier specification is 125-235 g/in and they are proposing opening the spec to 100-350g/in. This change will have no impact to form, fit or function of the products you purchase from Henkel. Due to the requirements of your change language, we required to notify you of this change. Thank you for your support with our products and we are looking forward to your continued business. Please direct any questions to your local Henkel Sales Representative.

Thank you for your continued business with Henkel and look forward to working closely with you in the future.

Sincerely,

Henkel Electronics
