Sta-Kon®

Experience the Sta-Kon® Terminal Advantage

The original Sta-Kon® Terminal Kit is an opportunity for you to get a broad sampling of the best terminals in the marketplace.

Made in U.S.A.

- Long barrel design — 20 to 50% longer than competitors! Eliminates missed crimps, increases conductivity and insulator stays on barrel
- Vinyl-insulated terminals have a brazed seam — 2½ times stronger than butted seams
- Selective annealing — leaves barrel soft for crimping while tongue remains strong
- Chamfered barrel — eliminates wire hang up
- Deep internal serrations — larger contact area lowers resistance and increases pullout strength
- Easy identification — stud and wire sizes are marked on the terminal
- High-conductivity copper, plated for corrosion resistance
